

SUMMARY

Senior iOS Software Engineer with 9+ years of experience building high-traffic consumer and enterprise iOS applications using Swift, SwiftUI, UIKit, Objective-C, Combine, Swift Concurrency (Async/Await, Task) and Clean Architecture. Experienced in modernizing legacy Objective-C codebases, developing modular iOS frameworks, integrating REST APIs, improving app performance, and delivering secure, accessible apps through CI/CD and App Store releases. Proven impact across retail, logistics, payments, customer support, and real-time delivery platforms.

CORE COMPETENCIES

Swift, SwiftUI, UIKit, Objective-C, Combine, Async/Await, Task, MVVM, Clean Architecture, Modular Architecture, XCTest, Swift Testing, XCUITest, CI/CD, REST APIs, App Store Releases, Accessibility, VoiceOver, Performance Optimization, Instruments, OSLog, MetricKit, CoreData, SwiftData, WebKit, PushNotifications, Secure Coding, Dependency Injection, SOLID Principles, Agile/Scrum

TECHNICAL SKILLS

- **Languages:** Swift, Objective-C, RxSwift
- **Frameworks & SDKs:** SwiftUI, UIKit, Combine, WidgetKit, ActivityKit, CoreBluetooth, CoreData, SwiftData
- **Concurrency:** Swift Concurrency (Async/Await, Task, Structured Concurrency), Combine, GCD, Thread Safety, Multithreading
- **Architecture Patterns:** Clean Architecture, MVVM, MVC, MVP, Coordinator, Modular Architecture, SOLID Principles, Dependency Injection, Scalable System Design, Delegate, Singleton
- **Networking:** REST APIs, GraphQL, Codable, JSON, Swift Concurrency, Alamofire, PromiseKit, OAuth, Token-Based Authentication
- **Databases:** CoreData, Realm, SQLite, SwiftData, UserDefaults
- **Cloud Messaging & Notifications:** Firebase (Crashlytics, Realtime Database, Remote Config, Analytics), AWS(CloudWatch), Microsoft Azure (Notification Hubs), Push Notifications (APNs, SNS)
- **Third-Party SDKs & Integrations:** Stripe, Jumio, Google Maps SDK, Google Navigation SDK, Google Driver SDK, Zendesk Messaging, Sinch
- **Security & Payments:** Mobile Security, Secure Coding Practices, Secure Data Storage, Keychain, Runtime Threat Detection
- **Testing & Quality:** XCTest, XCUITest, Swift Testing, Unit Testing, UI Testing, TDD, TestFlight
- **Developer Tools:** Xcode, Git, Jenkins, Fastlane, GitLab CI/CD, App Store Connect, Build Automation, Release Management
- **Monitoring & Analytics:** Mixpanel (incl. Session Replay), New Relic, Firebase Analytics, Performance Monitoring
- **Performance & Optimization:** App Performance Optimization, Network Optimization, Caching Strategies, Crash Reduction, Production Monitoring
- **Operating Systems:** macOS, Windows
- **Methodologies:** Agile, Scrum, TDD, SDLC
- **Platform & Developer Practices:** Accessibility(iOS), Swift Package Manager (SPM), AI-Assisted Development (GitHub Copilot, Windsurf, Codex)

PROFESSIONAL EXPERIENCE

7-Eleven

June 2023 - Present

Senior iOS Software Engineer

Irving, TX

Working on high-traffic retail applications including 7-Eleven, 7Now, Speedway, and Skipcart Driver.

- Built scalable consumer-facing iOS features using Swift, SwiftUI, UIKit, Combine, WidgetKit, and ActivityKit across retail and ordering platforms serving millions of users.
- Architected and maintained shared modular iOS frameworks adopted across multiple applications, reducing code duplication and accelerating feature delivery.
- Modernized legacy Objective-C/UIKit applications into Swift and SwiftUI using Clean Architecture, MVVM, SOLID Principles, and Dependency Injection.
- Integrated REST APIs using Codable, async/await, and robust error handling, improving network reliability and reducing UI inconsistencies.
- Improved application performance and stability using Instruments, Firebase Crashlytics, New Relic, and Mixpanel, achieving high crash-free session rates.
- Increased automated test coverage using XCTest, XCUITest, and Swift Testing, improving release quality and application reliability.
- Developed secure mobile solutions using Keychain, secure storage, runtime threat detection, and DataTheorem remediation practices.
- Implemented self-service customer support and refund workflows using Zendesk Messaging SDK, reducing support resolution time by ~30%.
- Migrated legacy dependencies from CocoaPods to Swift Package Manager (SPM), improving build performance and dependency management.
- Ensured accessibility compliance using VoiceOver, Dynamic Type, and accessibility identifiers for inclusive user experiences and UI automation testing.
- Delivered production releases through Agile/Scrum workflows, peer code reviews, CI/CD pipelines, TestFlight distribution, and App Store releases.

Skipcart Driver App

- Developed logistics and delivery workflows using Swift, SwiftUI, UIKit, and Clean Architecture for a real-time driver-focused delivery platform.
- Implemented Live Activities, BGTaskScheduler, and background location workflows to support real-time delivery tracking and driver status updates.
- Integrated Google Maps SDK and Google Navigation SDK for real-time route navigation, driver tracking, and delivery optimization features.
- Integrated Stripe SDK for payout management and Jumio SDK for identity verification, improving transaction reliability and platform security.
- Optimized application performance, caching, and API workflows, contributing to 99.5% crash-free users and improved delivery reliability.
- Built scalable modular components using Swift Package Manager (SPM), improving maintainability, reusability, and development efficiency.
- Integrated AWS SNS and Azure Notification Hubs for push notifications, delivery alerts, and operational communication workflows.
- Utilized Firebase Crashlytics, AWS CloudWatch, New Relic, and Mixpanel for production monitoring, analytics, and performance visibility.
- Achieved high test coverage using XCTest, XCUITest, and Swift Testing for reliable production deployments and release stability.

GP Infotech Pvt Ltd
Senior iOS Software Engineer

Jan 2019 - Dec 2021
 Hyderabad, India

- Led development of scalable iOS applications using Swift, SwiftUI, UIKit, MVVM, and Clean Architecture for international clients across education, conferencing, and fleet management domains.
- Developed conference management and real-time communication applications integrating Zoom SDK, Firebase Analytics, and Firebase Crashlytics for live event workflows and production monitoring.
- Built student communication and engagement features including Messaging, Push Notifications, and secure document access using Swift and REST APIs.
- Implemented real-time chat functionality using MessageKit and integrated facial recognition features using CoreML, TensorFlow, and Vision frameworks.
- Developed real-time fleet tracking solutions using Google Maps SDK with location tracking, clustering, animations, and route visualization features.
- Optimized networking layers with retry mechanisms, structured error handling, async workflows, and REST API integrations, improving application reliability and performance.
- Built and maintained reusable iOS frameworks and modular components using CocoaPods and Swift Package Manager (SPM) to improve code reuse and scalability.
- Modernized legacy Objective-C modules into Swift-based architectures, improving maintainability, scalability, and long-term application stability.
- Managed TestFlight releases, CI/CD workflows, peer code reviews, Agile/Scrum delivery, and production support and release activities across multiple client applications.

Tecordeon Software Pvt Ltd
iOS Software Engineer

May 2017 - Jan 2019
 Hyderabad, India

- Developed hardware-integrated iOS applications using Swift, Objective-C, UIKit, and CoreBluetooth for real-time BLE communication and device control workflows.
- Built and optimized Bluetooth communication layers with connection management, asynchronous command handling, and recovery mechanisms, improving connection reliability and reducing disconnect failures.
- Maintained and enhanced legacy Objective-C modules while integrating new Swift-based components for improved application performance and maintainability.
- Designed reusable Swift frameworks, custom UI components, and secure communication workflows for scalable hardware-integrated mobile applications.
- Implemented secure data transmission and custom protocol handling between iOS applications and BLE hardware devices.

Brucode Technologies Pvt Ltd
iOS Developer

Mar 2016 - May 2017
 Punjab, India

- Developed and maintained iOS applications using Swift, Objective-C, and UIKit, supporting the complete application lifecycle from development through production releases.
- Worked on legacy Objective-C codebases, implementing new features and refactoring modules to improve maintainability and application performance.
- Integrated RESTful APIs using URLSession and custom networking layers to support scalable mobile workflows and backend communication.
- Integrated third-party SDKs for authentication, analytics, and social login including Facebook, Google, Microsoft, and Twitter.
- Built reusable UI components and data visualization modules using UIKit and chart libraries for enterprise mobile applications.

EDUCATION

Oklahoma Christian University

Master of Science in Computer Science

Edmond, Oklahoma, USA

Jan 2022 – May 2023

Jawaharlal Nehru Technological University Kakinada

Bachelor of Technology in Electronics and Communication Engineering

Andhra Pradesh, India

June 2010 – June 2014
